MyHome WCs are made to compact dimensions, making them perfect for smaller bathrooms. With just a 600mm projection for close-coupled and 500mm for wall-hung and back-to-wall versions. There are four WC options, three fit up to the wall to hide all the plumbing and one allows for turned outlet pipes and exposed plumbing that is sometimes required. The toilet seat is fitted with soft close hinges and the seat can easily be removed for cleaning.

High quality rigid panels are available to match all of our baths. They are the same material as the bath and are designed with additional reinforcement so they keep their shape during use. The Ecoround and Viride models have panels designed to match the exact curve of the bath. The rectangular baths can be fitted with panels made of tiles or shower-wall materials, if desired.
