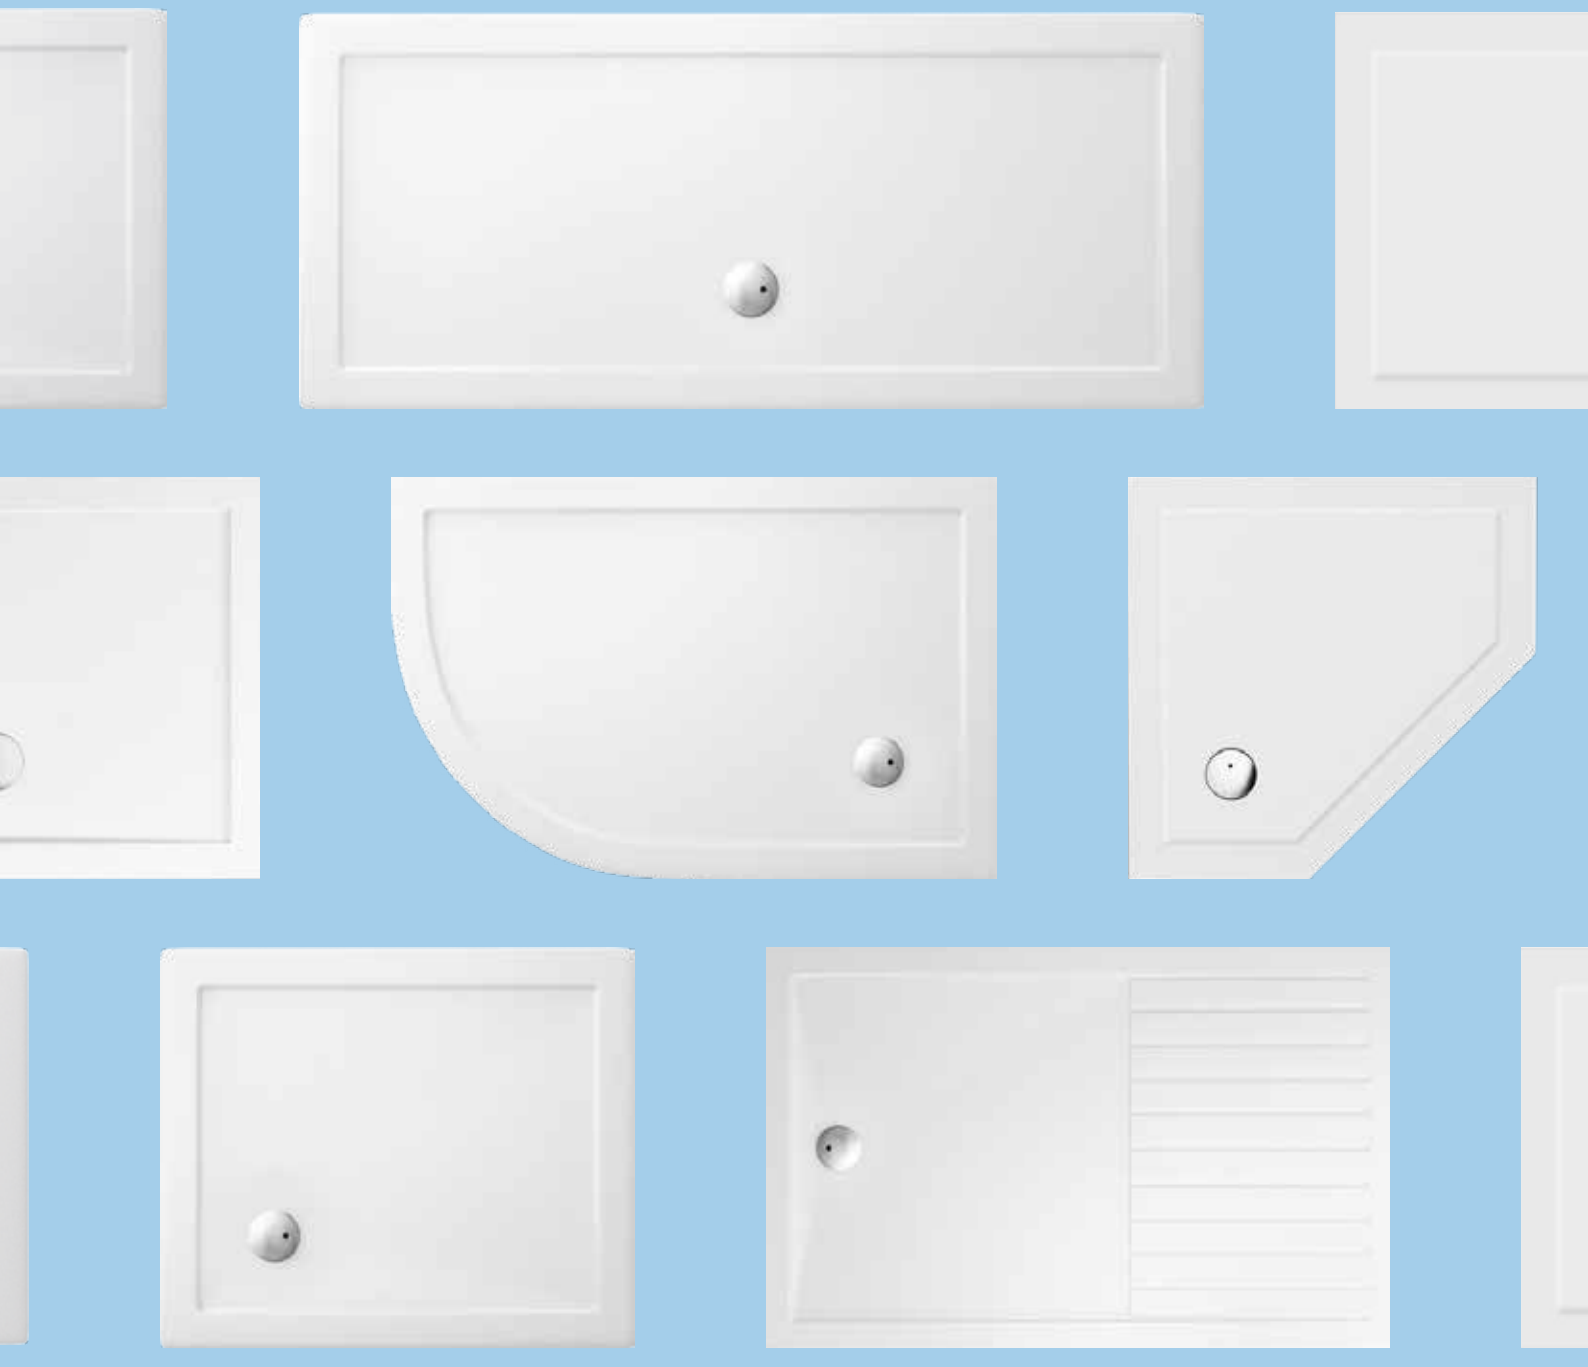
BRITTON®

Shower Tray Collection



Zamori®

35MM SHOWER TRAYS

Flexible installation

Option 1
Placed flat on the floor

The thin Zamori trays are only 35mm high which gives a modern, minimalist appearance to even the simplest and most cost effective installation method.

Option 2
Sunk into the floor

The low 35mm height allows the tray to be sunk into the floor so that the upper surface is level with the floor. The framed rim still allows good water retention to avoid water escape, especially when combined with the self cleaning Vortex high flow shower waste (which clears up to 30 litres of water per minute).

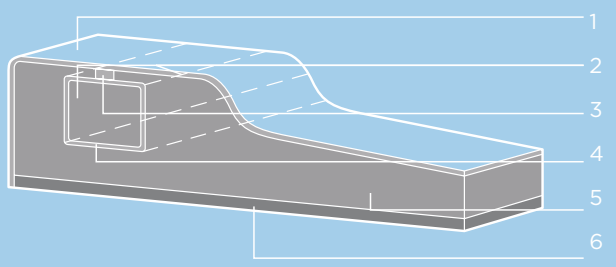
Option 3
Raised above the floor

Zamori offers optional adjustable legs and panel sets for raising the tray 100mm above the floor. This allows for easy access to any plumbing, and is often the preferred option when retro fitting a new tray into an existing location. The packs include removeable acrylic side panels to match the shower tray. These are held in place by magnetic clips to ensure maintenance is easy.

Reinforced Trays

All our trays are manufactured from Acrylic sheet and incorporate our patented steel reinforcing frame. This is formed to be the exact shape of each tray and ensures rigidity for a lifetime of use. The trays are flat on the under-surface; this makes installation and levelling very easy.

1 Acrylic capped ABS layer
2 Bonding layer
3 Thickness control pad
4 Steel frame structure
5 PU Foam
6 Insulation layer - ABS sheet



The Zamori 35mm high shower tray range is the most extensive available, with over 120 models to choose from to fit the space in your bathroom.

Anti-bacterial

All Zamori shower trays are impregnated with an anti-bacterial zeomic agent.

One of the amazing qualities of silver is that is has inherent anti-microbial properties - Zamori has added the silver-based anti bacterial additive Zeomic into the manufactoring process. The anti microbial qualities protect against harmful bacteria and suppresses mould growth.

1) The silver ions from Zeomic impregnate the microbe surface and are then absorbed by the cells through active transfer.

2) The silver ions react with several metabolic enzymes within the metabolic system of the microbes.

3) The activity of these enzymes is hindered and the growth of microbes is inhibited.

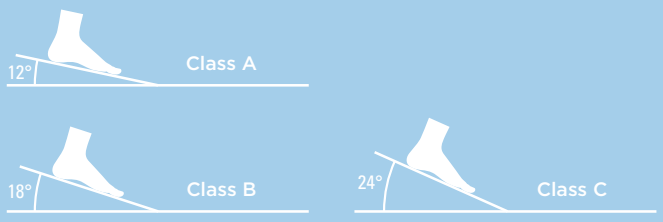
Anti-slip

Zamori anti-slip is simply the finest available.

Our anti-slip trays comply with DIN51097 class C - the highest anti-slip rating.

We are the only manufacturer to thermo bond the Swiss Grip Antislip onto the tray with a curing process - to ensure better performance for a cleaner and longer lasting surface.

DIN51097 class C anti-slip ramp test



Vortex turbo waste

Our shower waste is a 90mm diameter high flow Vortex Turbo waste designed to fit all our trays. This ensures that the water flows out at up to 30 litres per minute, making the Zamori shower waste one of the most efficient available - suitable for high volume showering applications.

The waste incorporates an easy clean removeable filter to capture any hair or other objects to remove the risk of blocking.

The waste is supplied with a solvent weld adaptor for different waste pipe sizes.
